

SARSTAT C is an anti-static agent that can be employed at various stages of fibre / yarn processing and has proved to be very effective on most textile fibres including synthetic fibres such as acrylic and nylon. Static build-up, wherever it is occurring can be successfully dissipated by the use of SARSTAT C during processes such as gilling. The product is a potent antistat that only needs to be used at low level applications to be effective.

SARSTAT C is available in 25 Kilo Kegs, 200 Kilo Drums or 1000 Kilo IBC's.

APPLICATION

SARSTAT C is normally used as supplied at an application level of between 0.5 – 1.0% (o.w.f.) and can be applied at any appropriate stage of fibre processing by spray, roller or applicable method.

TYPICAL PROPERTIES

Appearance	Clear, water-white liquid
Ionic Character	Cationic
Density	1.0
Solubility	Mixes readily with water
Biodegradability	Expected to be biodegradable

STORAGE ADVICE / SHELF LIFE

SARSTAT C should be kept in sealed plastic containers when not in use. Protect from frost and direct heat sources as evaporation can easily occur and will ultimately affect the products' performance. Store away from oxidizing agents.

HEALTH & SAFETY

Please refer to the Safety Data Sheet, freely available, for product handling and disposal advice. Please note that the SDS includes handling, storage, health and disposal information which should be passed on to anyone else who comes in contact with our product. Additional advice can also be obtained from your local representative.

NOTE: Read and understand all precautions on container labels before using this product.
