

# **SAR** Lubricants

Last Updated: 31/03/2017

Product Code: IT0035

**SARCLEAN PLUS** is a heavy-duty power cleaner additive with a high detergent formulation, for use primarily as an effective industrial hard surface cleaner. Suitable for use on a variety of surfaces, it can also be used as a heavy-duty commercial vehicle cleaner to remove stubborn road traffic film and grease deposits. Can also be used where a foam-type application is desirable when using high pressure or air-operated systems.

### **APPLICATION**

Phosphate-free power cleaning fluid formulated for use both in power cleaners, where a clinging, foam-type application is required, and as a manual cleaning medium at various dilution rates for cleaning equipment, floors, tiling etc.

Use at the following dilution rates:-

2% - 4%: in pressure washer applications

5% - 7%: in hot water for manual / brush applications

7% - 10%: in hot water for greasy equipment

Exact concentration levels can depend on local factors, such as water quality and hardness, levels of surface contamination etc. and should be established and optimized on site.

If used as a foam detergent, it is recommended to leave the foam on surfaces for a minimum 15 mins before rinsing with water. Heavy contamination may need agitation with a brush for more effective cleaning.

#### **BENEFITS**

- Wide range of industrial uses to cut through grease/oil deposits on hard surfaces such as floors, walls, tiling etc.
- Effective removal of general grime, grease and dirt on all types of machinery and components.
- Formulated with a blend of effective surfactants, complexing agents and solvents to effectively hold dirt in suspension and prevent re-disposition.
- Suitable for use in power cleaners, pressure washers or by manual brush applications.
- Can also be used for the removal of stubborn traffic film and deposits on commercial vehicles, buses etc.
- Phosphate free formulation.

## **TYPICAL PROPERTIES**

Colour: Blue liquid

Odour: Slight, nondescript

pH of Aqueous Solutions: 12-13 (2% aqueous solution)

Density@ 15.6°C: 1.000-1.100

# **HEALTH & SAFETY**

This product has been manufactured to the highest standards and when used for the purpose recommended is unlikely to present any significant health hazards. A Material Safety Data Sheet is available.

Indicated data are approximate values and are subject to the usual commercial fluctuations. All information correct at time of going to press to the best of our knowledge. This information may be subject to change without notification due to continual product research and development.
