

Last Updated: 13.11.2017

Product Code: CM0326

**SARFORM 326** is a high quality low viscosity concrete mould release agent, formulated with a customised blend of selected hydrocarbon components fortified with chemical release agents, which react with concrete to form a barrier between the mould and casting.

## APPLICATION

Use as received, application may be by either brush, roller or spray, (use appropriate respiratory protection if spraying). Avoid excessive build-up of product, especially in tight angles. Apply on the form face to facilitate the easy removal of components from moulds without damaging the concrete surface.

## BENEFITS

- Low viscosity formulation with mineral oil addition
- Produces good surface finish
- Excellent separation properties
- Ease of application
- Blemish free products

## TYPICAL PROPERTIES

Appearance	Thin, pale liquid
Specific Gravity @ 15°C	0.842
Viscosity @ 40°C	4.1 cSt
Flashpoint °C	70-80

## HEALTH & SAFETY

This product has been manufactured to the highest standards and when used for the purpose recommended is unlikely to present any significant health hazards. A Material Safety Data Sheet is available.

Indicated data are approximate values and are subject to the usual commercial fluctuations. All information correct at time of going to press to the best of our knowledge. This information may be subject to change without notification due to continual product research and development.
