

Last Updated: 30.11.2016

Product Code: CM0025

SARFORM F 25 is a very low viscosity mould release agent, formulated with a customised blend of selected mineral based components, solvents and additives.

APPLICATION

Suitable for use for in brick and concrete forming applications. Use as received, application may be by either brush, roller or spray, (use appropriate respiratory protection if spraying). Avoid excessive build-up of product, especially in tight angles.

BENEFITS

- Produces good surface finish
- Excellent separation properties
- Very low viscosity promotes ease of application
- Blemish free products

TYPICAL PROPERTIES

Appearance	-	Pale yellow liquid
Specific Gravity @ 15°C	-	0.802
Viscosity @ 40°C	-	2-3 cSt
Flashpoint °C	-	>70

HEALTH & SAFETY

This product has been manufactured to the highest standards and when used for the purpose recommended is unlikely to present any significant health hazards. A Material Safety Data Sheet is available.

Indicated data are approximate values and are subject to the usual commercial fluctuations. All information correct at time of going to press to the best of our knowledge. This information may be subject to change without notification due to continual product research and development.
